FOLLOW THESE EASY STEPS TO SET UP YOUR ADDITIONAL WI-FI POD(S):

1. Place the additional Wi-Fi pod where you want it and plug it into a power outlet.
2. When the light on the bottom of the Wi-Fi pod is solid green, your additional pod is now connected to your Wi-Fi network. This can take up to 5 minutes.

CHECK THE STATUS OF YOUR POD BASED ON THE LED LIGHT COLOUR:

Yellow:
Wi-Fi pod unit is starting up

Blue solid/pulse:
Wi-Fi pod is auto connecting to your network.

Green:
Wi-Fi pod is ready to use.

Red:
Reboot the Wi-Fi pod by unplugging the power adapter. Wait 30 seconds, then plug back in. If red light continues, check your main Wi-Fi pod as it might need to be rebooted by following the same process.

Tip: If you have already downloaded the TP-Link Deco App, the Pod(s) can also be added to your existing Wi-Fi network by pressing the "+" sign in the upper right corner of the home screen.
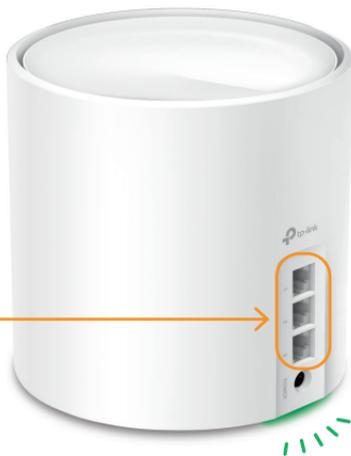

CONNECTING WIRED DEVICES

Each Wi-Fi 6 pod is equipped with three ethernet ports

Your modem will take one port on your main Wi-Fi pod. The additional ports or additional Wi-Fi pods can be used to connect a nearby device.

For example:

- Home Phone Analog
- Telephone Adapter (ATA)
- TV Set Top Box
- Gaming Console
- Computer

Download the TP-Link Deco app to manage your service

- Customize your Wi-Fi name and password
- Parental controls
- Create a separate network for guests
